

AutoCUBE® for SAP HANA ver 4.2

Optimized for BW on SAP HANA

AUTOMATE BW RE-MODELING

Automation of SAP BI Modeling

- Eliminate Human Errors
- Increase Quality
- Perform C4* Checks

ASSET PROTECTION

By automating complex BoH processes we eliminate inefficiencies. SmartCube considers billions of options and provides 'Right-Build', C4* optimized InfoProviders for SAP HANA

LOWER COSTS

Automation leads to lower operational costs and higher quality.

C4* (Critical Model Checks)

C1 = Information Content

C2 = Burden on system during 'Data Load'

C3 = Burden on system during 'Reporting'

C4 = InfoCube Footprint (space)

For BW without HANA

- Improve Query Performance
- Decrease data load time
- Automate InfoCube Modeling
- Conduct C4* checks every single time
- Automate InfoCube creation from DSO
- Lower BI operational costs

For BW on SAP HANA

- Eliminate redundant Objects
- Decrease database size
- Improve Data Quality
- Automate InfoCube Modeling
- Conduct C4* checks every single time
- Remodel InfoCube for SAP HANA

For BW/4 HANA (NEW)

- Self Service Transparent Components
- User Friendly Modeling

For SAP BW

- Improve BI query performance
Enhance User Satisfaction
- Decrease InfoCube load time
Help meet load SLA's
- Create InfoCube from an ODS
Improve operational report performance
- Simulate & version InfoCube models
Compare versions for C4 impacts*
- Prioritization & rationalization of queries
Build 'Information Delivery' models
- Plan data growth & usage patterns
Build InfoCubes based on future needs
- Automate InfoCube Quality Assurance
Model InfoCubes on sound principles
- BI Documentation tool
Simple documentation for InfoCube Star Schema
- Leverage breakthrough InfoCube dimension modeling technology
Deploy a perfect InfoCube every time
- Automate create / redesign InfoCubes
Eliminate human errors

For SAP BW-on-HANA Migration

Reduce InfoCube Footprint for BW-on-HANA
Remodel Cube for SAP HANA
Eliminate redundant Objects
Replace manual costs with Automation efficiencies
Decrease annual BoH costs, lower TCO

Create HANA InfoCubes from existing Cubes
Decrease BW Cube Footprint for HANA
Eliminate Higher costs due to carrying dead data

For BW/4 HANA Planning (NEW)

User friendly models for Self-Service Architecture
User friendly Designs
Easy to use dimensions and grouping of objects
Easy for Self Service Users

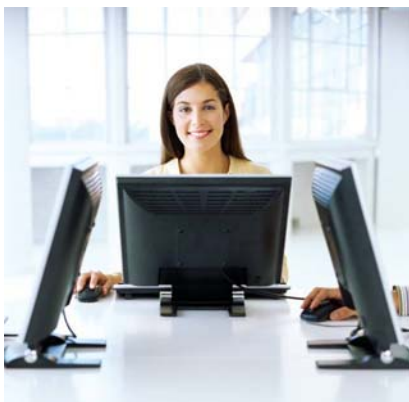

DSO to InfoCube Creation

One of the critical requirements for BW Query Optimization without HANA is creating Cubes from DSO's. This is required to eliminate 'Reporting Drag' caused by DSO. SmartCube can automate the DSO→InfoCube creation process.

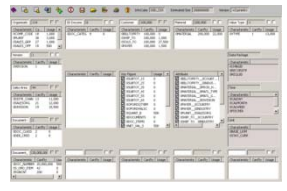

- BW** For **SAP BW Customers**
- Improve Query Performance
 - Reduce InfoCube Load times
 - Create Infocubes from ODS
 - Eliminate Query-Drag' from DSO
- HANA** For **SAP HANA Customers**
- Reduce BW Footprint for HANA
 - Eliminate redundant Objects
 - Reduce TCO for BoH

Eliminate Errors → Increase Quality → LOWER COSTS
Do it Faster

Breakthrough Technology

Automated modeling
With a single click AutoCube will automate the 'Right-Build' InfoCube model'. Models can be versioned for C4* comparison

Real-Time C4* comparison's
AutoCUBE Cockpit visualizes all C4* BI optimization checks. [1] Information content, [2] Query execution Time, [3] Data Load Time and [4] InfoCube Footprint.

- TECHNICAL SUPPORT**
- 24 x 7 Technical support
 - 2 days product training
- ZERO DOWNTIME**
- No Downtime requirements
 - Can be connected to Production
 - Provides models instantly
- TURNKEY SOLUTIONS**
- SAAS – Software as a Solution
 - DSO to InfoCube conversion
 - Slimming BI footprint for HANA
 - HANA Readiness workshop
 - Modeling & Architecture Audits

About We are a 100% SAP HANA focused company, formed by global SAP HANA deep Business Benefit Focus. We provide HANAlytics for the, Digital enterprise, Mobility and migration support services to SAP and SAP HANA customers. We have assisted many US and global companies exceed their SAP business goals. Our teams have designed new 'Global Federated Architectures' in accordance to Gartner guidelines, assisted customers audit SAP & BW Architectures, provide re-architecture solutions, run SAP, BI & SAP HANA projects & manage end-to-end SAP lifecycles. Our focus is on delivering 'Business Value Assurance'.

Our Product Portfolio

Area	Product	Service Offering	
SAP BI	AutoCUBE®	Reduce report run times and data load times. Reduce InfoCube footprint for HANA. Design optimized Infocubes from ODS. <i>Seamless integration with SAP HANA.</i>	
	BASIS Admin	SAP Fiori based SAP and SAP HANA Basis monitoring cockpit for advanced, Self-Service analytics on the condition of your SAP and SAP HANA Landscapes	
SAP BWA	BWA Workbench	One stop tool for Data reconciliation, daily roll-up check, Planning, Sizing, Tracking, Forecasting, Simulating, & Optimizing BI Accelerator. Has an Operational BWA cockpit for routine support. <i>Seamless integration with AutoCUBE</i>	
SAP Suite	AutoABAP®	Auto Optimizer	Enhance existing ABAP programs automatically. Drag & drop ABAP programs, tool provides optimized ABAP
		Auto Scope	Output core logic of large ABAP programs for easier comprehension. Excellent ABAP documentation tool
		Auto Index	Identify optimal secondary indices. Enhance performance of a group of custom ABAP programs
		Auto Buffer	Automate optimization of buffer settings on database tables for enhanced performance
		Auto Check	Identify potential inefficiencies & breaches to coding standards in custom ABAP programs. Rapidly check for ABAP Standard compliance.
<i>List of Components available from our Suite of Products</i>
